PROFESSIONAL SUMMARY

Third-year B.Tech Computer Science and Engineering student at VIT Bhopal University with hands-on experience in full-stack development and artificial intelligence. Skilled in Python, JavaScript, SQL, and C++, with practical project experience building AI-powered platforms, event management systems, and waste classification solutions. Active hackathon participant and technical team member committed to delivering scalable, user-centric solutions.

EDUCATION

Vellore Institute of Technology (VIT) Bhopal University

April 2024 – April 2028

Bachelor of Technology — Computer Science and Engineering (CSE Core)

CGPA: 8.87

TECHNICAL SKILLS

Languages: Python, SQL, Java (Basic), C++, JavaScript, HTML, CSS

Frameworks & Libraries: Pandas, NumPy, Scikit-Learn, Matplotlib, TensorFlow, Streamlit

Databases & Tools: MySQL, PL/SQL, Jupyter Notebook, Visual Studio Code, Git

Platforms: Jupyter Notebook, Visual Studio Code, GitHub

Soft Skills: Team Collaboration, Communication, Event Management, Problem-Solving

PROJECTS

CampVerse — Event Management Platform

HTML | CSS | JavaScript | AI

- Developed a multi-module web platform to streamline campus event organization and participation end-to-end.
- Integrated Genify (AI-based banner generation), HustleHub (volunteer recruitment), ClockedIn (event calendar), Radar (interactive map), and Feedback (post-event reviews) modules.
- Built responsive, user-friendly UI using HTML, CSS, and JavaScript, improving event discoverability for 500+ users.

AirLytics — Aviation Damage Prediction System

Python | Machine Learning | Scikit-Learn

- Engineered an AI-powered aviation damage severity prediction platform using Python and machine learning models.
- Leveraged Scikit-Learn and Pandas to analyze aircraft incident datasets and accurately classify damage levels.
- Contributed to improved aircraft safety and maintenance efficiency by automating damage assessment workflows.

ServiGo — Customer Support Automation Platform

Python | NLP | API Integration

- Built an AI-powered customer support and service automation platform integrating chatbot technology for real-time query resolution.
- Implemented intelligent NLP algorithms to produce context-aware, accurate responses, reducing manual support overhead.
- Integrated third-party APIs to ensure seamless business operations and enhanced user engagement.

A.W.A.R.E — Waste Classification System

Python | TensorFlow | Image Recognition

- Developed a waste classification system using image recognition to identify and categorize waste into recyclable and non-recyclable types.

- Leveraged TensorFlow and computer vision techniques to deliver high-accuracy real-time waste detection.
- Incorporated waste bin location tracking to promote environmental sustainability and efficient waste management.

Care Maa Maternal Health Support Platform

Python | NLP | Web Development

- Built a dedicated maternal health platform providing personalized guidance, health tracking, and support resources for expecting and new mothers.
- Integrated NLP-powered chatbot to answer real-time health queries, reducing dependency on manual consultations.
- Designed an intuitive, accessible UI focused on ease of use for non-technical users in rural and semi-urban areas.
- Aimed at bridging the healthcare information gap for mothers with limited access to professional medical advice.

WORK EXPERIENCE & OPEN SOURCE

Contributor — GirlScript Summer of Code 2025

September 2025 – Present

- Actively contributing to open-source projects as part of the GirlScript Summer of Code program.
- Collaborating with global developers on code reviews, bug fixes, and feature development.

Technical Team Member — Null VIT Bhopal Student Chapter

August 2025 – Present

- Organized and hosted 3 Capture-The-Flag (CTF) cybersecurity challenges focused on MySQL and IDOR vulnerabilities.
- Designed challenge scenarios to build practical security skills among 100+ student participants.

Technical Team Member — Mharo Rajasthan Club

August 2025 – Present

- Co-organized Rangilo Rajasthan cultural event, managing logistics and coordinating a crowd of 600+ attendees.
- Handled technical coordination and communication across teams to ensure seamless event execution.

CERTIFICATIONS

- **Analytics SQL for Developers** — Online Certification
- **Programming in Java** — Vityarthi course
- **SkillUp for SQL** — Online Certification
- **Python Essential** — Vityarthi course
- **CS107 C++ Programming** — Online Certification
- **Fundamental of AI and ML** — Vityarthi course
- **Forage by JP Morgan Chase** — Virtual Experience Program
- **NPTEL Cloud Computing** — NPTEL Certification
- **MATLAB Onramp** — MathWorks
- **HP Power Lab 2.0** — HP Certification
- **Health Hackathon ' 26** - Certificate of participation
